

# Month End Rollover

Last Modified on 20/08/2025 11:54 am AEST

The instructions in this article relate to **Month End Rollover**. The icon may be located on your [StrataMax Desktop](#) or found using the [StrataMax Search](#).

For guidance on the "month end process" including processing recoveries and management fees, see [Month End Process](#).

StrataMax is designed for real-time financial management, where journal entries instantly impact account balances. To ensure proper ageing of owner and creditor accounts, entries for a new period can only begin once the previous month has rolled over. This automatic rollover process occurs at the beginning of each month, after the banking has been processed and reconciled for the last day of the previous month, and is set on a schedule - simplifying month-end processing and keeping financial records accurate and up-to-date.

If a building has sub-groups (such as utilities), all transactions for each sub-group must be entered for the current month before rolling over.

How the Automatic Rollover Works:

- **Storage of Financial Statements and Bank Reconciliation Reports:** These are securely stored at the time of rollover for future reference.
- **Carry Forward of Balances:** All balances from the previous month roll over into the new month.
- **Transfer of Surplus/Deficit in Administrative and Sinking Funds:** These balances move to the Owners Funds account through the Appropriation Account.
- **Interest Debits for Overdue Levies:** Applicable interest on overdue levies is debited to owners' accounts.
- **Validation of SCM Bank Accounts:** Accounts are checked to confirm they remain valid.

Once a *Month End Rollover* has been completed, the *Buildings Not Rolled* [Dashboard](#) item is a simple way of being able to check that all buildings are rolled into the current month.

---

# Automatic Month End Rollover

In StrataMax, for standard operations, month end rollovers proceed automatically.

There is an option in the configuration menu, which automates the rollover process. Rollovers run on a schedule in the background, which includes global configuration settings. The interface sets these settings to skip or run based on the required criteria.

On the first business day of the month, the schedule will check BCMax Buildings and GLMax Companies (if this has been client initiated for configuration) and determine if all configured conditions are in a position to process. This schedule will continue to process regularly on buildings and complete rollovers. If you would like to arrange for a specific schedule start time, please contact [support@stratamax.com.au](mailto:support@stratamax.com.au).

Buildings that cannot automatically roll over will be identified on the **Dashboard** icon called *Buildings Not Rolled*, where an extra column displays the reason (see [Dashboard](#) for more info). One reason could be that the last day's banking has not been done because the account is closed, but the building status has not been changed to 'Lost' or the account has not been removed from the [Bank Account Setup](#) screen.

Once resolved, the building will attempt to roll over again when the schedule next runs automatically, or you manually initiate via *Options > Action Automatic Rollover*.

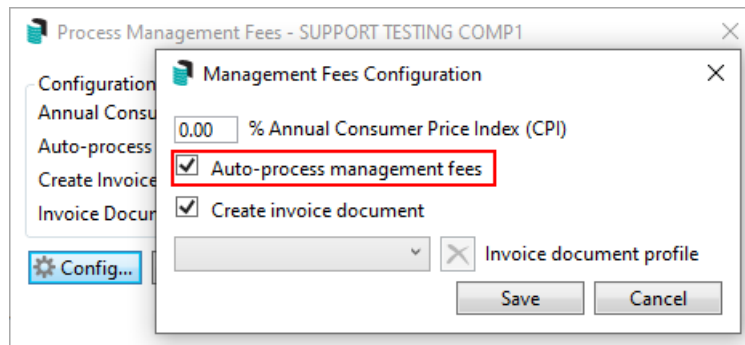

Building Number	Building Name	Account Manager	Last Month End	Auto Month End Status
220702	AQUA RESORT		31/12/22	Last BAS has not been saved.
641351	BENDOWA TOWERS		31/05/22	Bank Account 012 set for manual entry - Auto Rollover not allowed
53435	BMC Building 2		30/09/22	Error
1345131	HARBOUR VILLAS		30/06/22	Last BAS has not been saved.
2021	LANA RESORT		31/12/22	Bank Account 012 set for manual entry - Auto Rollover not allowed
558764	LATROBE LANE		31/01/23	Last BAS has not been saved.
131	ONE HOUSE		30/11/22	Bank Account 012 set for manual entry - Auto Rollover not allowed
25000	OPENING BALANCES		31/01/23	Bank Account 01401 set to not reconciled (using Other Investment Accounts) - Auto Rollover not allowed
4542	ROYAL TOWERS		30/06/22	There are Invoice Hub approvals pending in old year data. You cannot roll over the year end until they are either approved or retracted
98	STRATA PLAN 98		28/02/22	Bank Account 012 set for manual entry - Auto Rollover not allowed
1521	STRATAMAX ONLINE HELP		30/06/22	Bank reconciliation outstanding - 012
09876	TEST BUILDING		28/02/22	Skipped for automatic rollover
96322	The Accoral Avenue		31/10/22	SCM bank account is invalid or is not linked to this drive - 012
451354	VICTORIA DAIL MC		31/01/23	Error
				SCM bank account is invalid or is not linked to this drive - 012
				Last BAS has not been saved.
				Building locked by user
				Bank Account 012 set for manual entry - Auto Rollover not allowed

If you are rolling over buildings manually and pending transactions need to be processed the same day as rollover, you will need to produce a [Financial Statement](#) with the *Post Standing Journals* tick box enabled. You will then see the balance for your company appear in [Payments](#).

If there are times when a particular task should be completed, you can temporarily disable the automatic month end rollover, until you are ready to enable it again. This can be useful when interest amounts for investment accounts have to be applied, or when adjustments need to be made to accounts to ensure they reflect in the building's [Financial Statements](#) that are stored at rollover – possibly to be used in [Status Reports](#).

After the *Automatic Month End Rollover* has been enabled, any pending transactions, such as [Recoveries](#), will process when the date of the transactions is in the *future* of the current posting month, and then becomes *current* upon the completion of the rollover. The same can occur for [Management Fees](#), however, you must enable *Auto-process management fees* in the *Configuration* menu in [Process Management Fees](#).

The *Management Fees* will then process with the auto-rollover for **GLMax**, up until and including the current working date.

## Automatic Month End Rollover | Security Setup

The permission in *Security Setup* is called 'Edit Month End Rollover Configuration'.

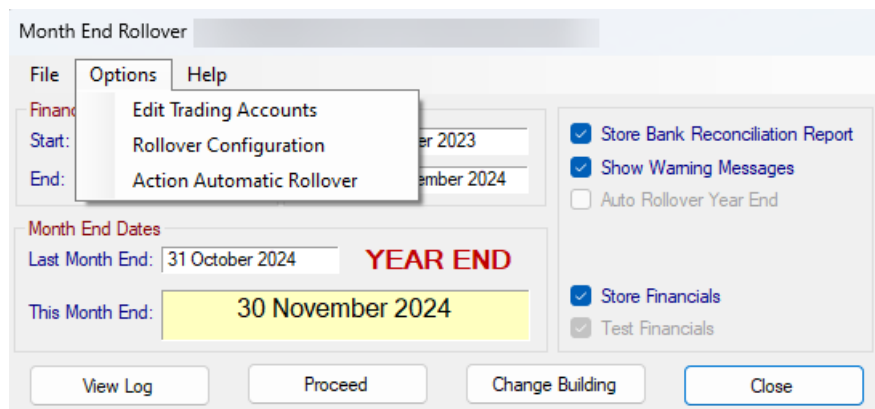

## Automatic Month End Rollover | Setup

Before opening the **Month End Rollover** icon, the working date must be set in the future to access the *Auto Rollover Configuration* area. Check the working date and current month. If the date is set within that month, it must be pushed forward to access the below configuration and then changed back to the current date after setting.

Open **Month End Rollover** and click *Options*.

## Rollover Configuration

All configuration settings are global and will affect all users. These settings will override those set in

the **Month End Rollover** screen where the manual process is run.

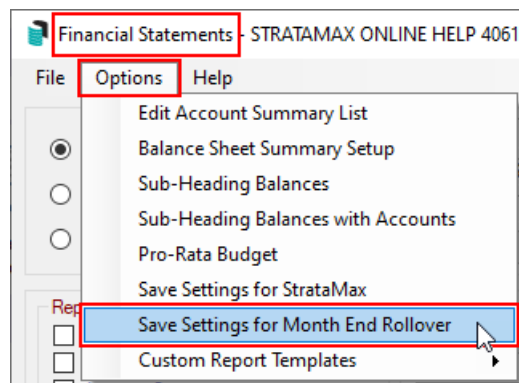

## Auto-Rollover

The following options are available to control whether GLMax is rolled, and also buildings for specific scenarios.

- *Run month end rollover automatically*: Activates Auto-Rollover and adds a column called 'Auto Month End Status' to the *Buildings Not Rolled* report in the [Dashboard](#).
- *BCMax only (skip GLMax)*: Rolls BCMax buildings only, and not GLMax.
- *Do not automatically rollover year ends*: Prevents year end rollovers. The reason you would enable this setting is when you need to enter creditor invoices before rolling into the new year.
- *Allow rollover of building with no bank account details*: Allows a building to be rolled over without bank account details present in the [Bank Account Setup](#) screen. By default, this is not allowed.
- *Skip automatic rollover for this building*: Will not roll over the current building you are working in.

## Month End

- *Store Financial Statements on rollover*: This applies to automatic and manual month end rollovers. This stores [Financial Statements](#) based on the settings recorded in [Financial Statements](#), in [Options > Save Settings for Month End Rollover](#). For more info, see [Financial Statements / Automatic Month End Rollover](#).

- *Save Status Reports to DocMax on rollover*, which is a global setting that will allow these reports to auto-save to DocMax using the profile Monthly Status Report.

### Action Automatic Rollover

This option will immediately action any auto-rollover configured settings.

## Settings and Explanations

In **Month End Rollover**, there are a number of options that can affect the manual month end rollover process, these settings are explained below.

 A screenshot of the "Month End Rollover" settings window. The window title is "Month End Rollover - STRATAMAX ONLINE HELP KEEP 300621 01 October 2024". It has a menu bar with "File", "Options", and "Help". The "Options" menu is open. The settings are organized into sections:
 

- Financial Year**: Start: 1 June 2024, End: 31 May 2025.
- Levy Year**: Start: 1 June 2022, End: 31 May 2023.
- Month End Dates**: Last Month End: 31 August 2024, This Month End: 30 September 2024 (highlighted in yellow).
- Checkboxes**:
  - ☒ Store Bank Reconciliation Report
  - ☒ Show Warning Messages
  - ☐ Auto Rollover Year End
  - ☒ Store Financials
  - ☒ Test Financials

 At the bottom, there are four buttons: "View Log", "Proceed", "Change Building", and "Close".

#### Financial Year

Start and End is the Financial Year for the building.

#### Levy Year

Start and End date is the Levy Year for the building.

#### Month End Dates

Last Month End: Is the date for the previous month end for the building.

This Month End: Is the date for the current month end for the building.

#### Store Bank Reconciliation Report

Stores a copy of the current bank reconciliation report.

#### Show Warning Message

StrataMax will prompt for approval to rollover a building if a building is at year end or GST registered. If a global process to rollover all (or many) buildings is being run, and this warning message is to be ignored, then untick this setting and tick 'Auto Rollover Year End', 'Auto Rollover GST Registered' and 'Test Financials'.

### Auto Rollover Year End

Select this option to automatically rollover year end buildings. This will depend on the preferred procedure of your office. If a building is at year end and this option is NOT selected, then the building will not be rolled over and it will be added to the month end rollover log file for you to manage manually. Some buildings may need particular attention at year end.

If the *Auto Rollover Year End* box is inactive, then remove the tick from the *Show Warning Messages* box above it.

### Store Financials

This only applies to manual month end rollovers, not automatic month end rollovers. StrataMax will store the Financial Statement using the same style and settings that have been configured in Financial Statements. For setup instructions, see [Financial Statements / StrataMax Portal & Manual Month End Rollover](#).

### Test Financials

Tick option to test the Financials to ensure they balance.

### View Log

This area will log any buildings that have not been able to rollover, and will contain any error messages relating to Month End Rollover processes.

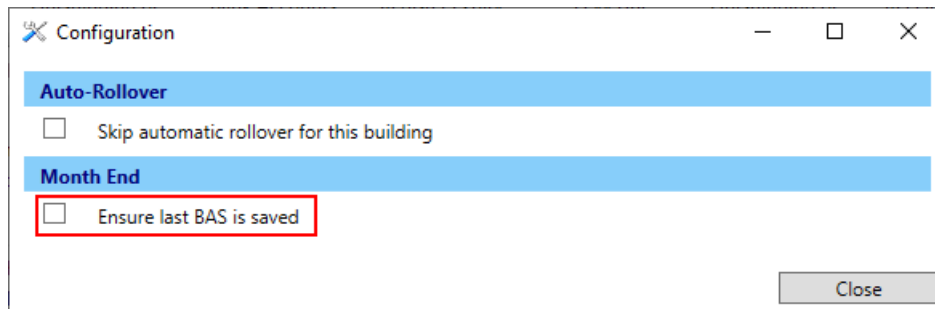

### Change Building

This button will allow for a building tag list with filters applied where required, to allow for multiple buildings to be rolled in the one action. This is considered a global month end rollover when more than one building is selected.

## GLMax | Month End Rollover | Skip GLMax BAS Check

To skip the BAS Check process in GLMax for Companies where the BAS is not required, the following setting can be configured which will allow for buildings not using the corporate **Bank Account Setup** in GLMax, and have the company also auto rollover;

1. Navigate to GLMax and select the Company.
2. Search or select **Month End Rollover**.
3. Select *Options > Rollover Configuration*.
4. Untick *Ensure last BAS is saved* to turn off the BAS Check or tick setting to leave the BAS Check on.

## Manually Process Month End Rollover

If a manual Month End Rollover is being actioned, review any of the month end rollover options. When completing a global month end rollover, check the [Settings and Explanations](#) section above to understand the needed options. GLMax is also subjected to the same process each month.

### BCMax Buildings Month End Rollover

1. From BCMax Buildings, search or select **Month End Rollover**.
2. Click *Change Building* and tag multiple buildings, or *Ctrl+A* to tag all buildings and click *OK* (or select the *Filter* menu and select from one of the options).
3. Click *Proceed*, review each message as noted below, and click the appropriate button when prompted.
4. Click *Close* when this process is finished.

### GLMax Buildings Month End Rollover

1. From GLMax Companies, search or select **Month End Rollover**.
2. Click *Proceed*, review each message as noted below, and click the appropriate button when prompted.
3. Click *Close* when this process is finished.

## Messages included in the process

The following messages may appear depending on the options selected:

- *'Have you processed banking for the last day of the month?'* Click *Yes* if the banking has been processed for the last day of the month.
- *'Are you sure you want to automatically roll year end?'*
- *'This Building is GST Registered Are you ready to rollover?'* Click *Yes* to continue the rollover.

Reviewing the *Buildings Not Rolled* dashboard once the process has been completed is

recommended to check all buildings have rolled as expected.

## Year End Rollover

**Month End Rollover** is also used for buildings, which have reached their financial year end. StrataMax will roll the current year and it will then become the old year, and a new current year will be created.

This process carries forward the closing balances at the end of the final month of that year as the opening balances of the new current year. All current data will be transferred to the old year for reference, and journal entries for any required adjustments can be made in **Journal Preparation** in the Current Year with an Old Year Financial Year date.

This information is available for comparative budget and **Financial Statement** reports. If any levies which have been struck and generated relate to the next financial year the appropriate income account will be adjusted for the next year.

Reverse functions are only available in the current year, and therefore only journal entries may be processed for the Old Year. If any changes are required for transactions, this would need to be completed before the year end rollover is carried out. However, if only journals are required, then the building may be rolled as per the below steps. **Change Transaction Code** can be used to move transactions between income and expense codes after the year end rollover has been completed.

## Month End Rollover Log

1. Search or select **Log Viewer**.
2. Adjust the Category to MONTHEND.LOG
3. Review the *Date/Time* range and adjust as required.
4. Click *Refresh*.

## SCM Bank Accounts

During Month End Rollover SCM Bank Accounts are checked to ensure they are valid (associated with the building); for any buildings with invalid bank account details, these details would need to be corrected or removed from **Bank Account Setup** or the Investment Bank Account Details before the building can be rolled.

The *Invalid SCM Bank Accounts Dashboard* icon can be used to monitor invalid SCM Bank Accounts, as this will update automatically as part of the daily banking process and will display which account code the bank account is setup for.

## Month End Rollover | FAQ

### Q. If the Automatic Month End Rollover has failed, what should I do?

A. You can use a Dashboard icon called 'Buildings Not Rolled', where an extra column will be displayed with the reason for not being rolled over (see [Dashboard article](#)). Once you have investigated and resolved the issue, you can either wait for the building to automatically roll over again when the schedule next runs, or you can simply roll the building over manually.

### Q. How can I check if the Month End Rollover process has finished for one or all properties?

A. You can quickly check the Current Month displayed on the StrataMax [Desktop](#) of the selected building. You can add a [Dashboard](#) item for 'Buildings Not Rolled', which will notify you if any buildings aren't rolled and list them when clicked.

### Q. Is it suitable to enable the automatic month end rollover for buildings with term deposits?

A. If you have the Investment Accounts setup in Bank Account Setup and are importing and reconciling transactions (recommended) then, Yes - the auto rollover is suggested as all the transactions will have been processed with the normal banking process. If investment accounts are being reconciled manually (no statement data), then if you want to reconcile interest manually before the rollover, select the building to not auto rollover.

*NOTE: If the Investment account is setup and not imported and reconciling, the auto-rollover will exclude so that this can be checked and rolled over.*
