

# Utility Billing | Introduction & Setup

Last Modified on 07/05/2025 10:38 am AEST

The instructions in this article relate to **Utility Billing**. The icon may be located on your [StrataMax Desktop](#) or found using the [StrataMax Search](#).

**Utility Billing** allows the facility to create bills for owners or tenants for any electricity, gas or water usage based on meter readings. It also provides a billing solution for marina funds and air conditioning, using Levy Management to create bills. This functionality is maintained via a 'Sub-Group', which can be changed by selecting from the *Main* to the *Utility*, next to the building selector tool when using this type of function.

Data can be imported from the main building, also referred to as a 'group', to create debtor accounts in the sub-group to reduce the need for manual entry. Bills are issued to either the owner or the tenant and available for distribution to each contact via email or post.

This module can manage full arrears, similar to that in the main group when running regular levies and automated fee applications. When combined with StrataPay, this creates an easy system for reconciling the payments to the relevant lot in the subgroup.

Where the word 'Electricity' is used, this can be changed to 'Water' or any other utility used in the *Utility Group*.

We also have the [Sub-Groups | Basic Setup Video](#), which covers this process.

## Sub-Group Types

The following types are available to set up in the Sub-Group area and will issue the following:

- Marina - Issues levies via **Levy Management**.
- Utilities - Issues utility bills based on usage via **Utility Billing**.
- Air Conditioning - Issue levies via **Levy Management**.
- By-Laws - Issues invoices via **Invoice Entry**.

## New Sub-Group Setup

A [building](#) must exist before a sub-group can be applied. While this sub-group is being set up, it is recommended that the building be [locked](#).

1. From the *Main*, search or select **New Sub-Group**.

2. In the *Sub-Group* section, select the type of sub-group you wish to set up.
3. The Lot Emulation section is set up based on what the Debtor Maintenance records should do.
  - *Emulate All Lots*— Copy all lot owners' accounts from the main group in the building to the sub-group.
  - *Emulate Selected lots* - You can tag which owner lot accounts to copy into this sub-group.
  - *No lot emulation* - No owner lot account will be copied. You can set them up individually as required using **Debtor Maintenance**.
4. Click *Add*, then *Close* to exit.

If there is an existing sub-group and new lots are added in the Main, there will be an option to [add new lots](#) to the Sub-Group at the same time.

## Sub-Group Debtor Maintenance (contacts)

The sub-group will use these debtors to bill each contact. They can be made up of owners and tenants and include agents where needed. What has been set for the lot emulation will dictate how these debtors are entered and maintained with **Debtor Maintenance**.

## Bank Account Setup

The bank account details, such as BSB and bank account details, should be included, and the same main operating account will be used. This information is populated from the *Main* building. When generated on the bill, the Payment Reference numbers allow the payment to settle to the correct account and are different between the *Main* and the *Sub-Group*.

1. In the main building, open the **Bank Account Setup** menu.
2. [Enter a New Operating Bank Account](#).

## Edit Bill Title

Depending on the type of utility being billed, the wording from the standard Electricity wording used on the bill templates may need to be changed to reflect the utility type. The instructions below will allow the description and measurement defaults to be changed. Income account 101 must be [linked](#) first to open the utility billing area using the below instructions.

1. From the Sub-Group building, search or select **Utility Billing**.
2. Select File / Edit Bill Title.
3. Amend/check the title to reflect the intended utility type. Click *OK*.
4. Amend/ check the unit title and adjust it to reflect the usage type.

# Marina | Levy & Arrears Notice E-mail Templates

Levy and arrears notices in Marina Sub-Groups will utilise the local *Levy* or *Arrears* notice email template if one has been set up. Please refer to the [Email Template Manager](#) article to learn how to manage email templates.

## Utility Bill Template (Display Multi-Tariffs)

Where multiple Tariffs are required, the display can produce the rate along with the Tariff name on the utility bills.

1. From the Utility Sub-Group, search or select **Utility Billing**.
2. Select *File > Configure*.
3. Select *Show 1st Tariff Rate with Name*.
4. Select *Close*.

The screenshot shows the 'Configure Electricity' dialog box with the following settings:

- ☒ Cents Adjustment
- ☒ Auto Debit Security Deposit
- ☒ Tariff and Meter Number on Same Line
- ☒ Include Security Deposit in Aged Balance, Account Dissection List, Arrears Letter and Ledger Card as Notation
- ☒ **Show 1st Tariff Rate with Name** (highlighted with a red box)
- ☒ Allow Invoice Entry
- ☐ Output Meter Number Only (Excluding Tariff Description)
- ☐ Output Tariff Description
- ☐ Always show last active global message (Bill)
- ☐ Always show last active global message (Arrears)
- Global Default Security Deposit Amount: 50.00
- Refund Clearing Account: 0601
- Group Bank Account: (empty field)
- (Numbers only. No hyphen or spaces)
- ☐ Print Bills in: Duplex Printing Caution
- (highlighted with a red box)
- Set No Delete Sundry Charges for Finalising Accounts
