

# Word .doc Merge Fields

Last Modified on 19/02/2026 8:44 am AEST

This article refers to the lists of merge fields available in *Merge Letters* and *Report Distribution* for Microsoft Word documents. For a list of merge fields included using the .LET StrataMax Letter style, please see this article *Notepad .LET Merge Fields*.

The tables below include the categories and original merge field names available in *Merge Letters* and *Report Distribution*.

## Explanatory Reference

Category	StrataMax Menu Fields are from:
Building Merge Fields	Building Information
Contracts Register Merge Fields	Contracts Register
Creditors Merge Fields	Creditor Maintenance
Data Formatting Merge Fields	Formatting
General Merge Fields	Other Fields
General Ledger Merge Fields	General Ledger & Other Fields
Inspections Merge Fields	Inspections Register
Insurance Merge Fields	Insurance Menu
Letting Agents Merge Fields	Letting Agent Tab
Levy Control Merge Fields	Levy Management
Levies UnStruck Merge Fields	Levy Management
Office Bearers Merge Fields	Office Bearers
Roll Information Merge Fields	Roll
Special Merge Fields	Inserts Merge Code only
Tenant Merge Fields	Lessee

## Merge Field Editor

The 'Merge Field Editor' window is where all the available merge fields are; either using the category list to identify merge fields or the search field can assist with locating merge fields to add to a document.

1. Search or select *Merge Letters* from Main or Sub-Group.

2. From the Report Selection window, click *Merge Letters*
3. Click *Fields* to display the *Merge Field Editor* screen, where merge fields can be added or removed.
4. Click *Save* to save any merge fields.

## List of Data Formatting Commands with Field Codes

<Building-12-Less(42)days-WordDate-12>

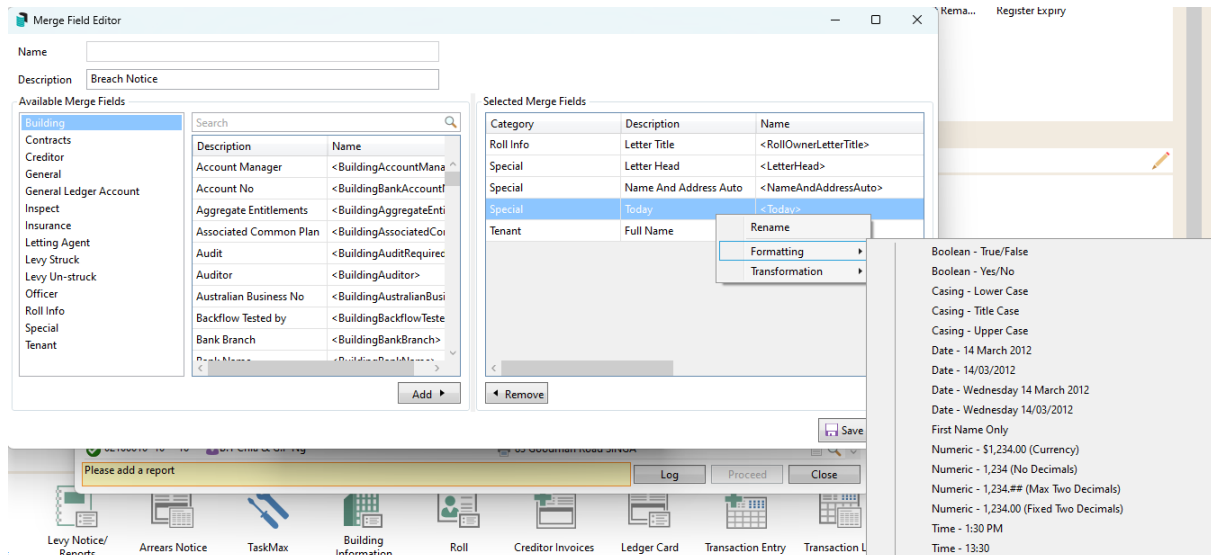

The example above will show the financial year end plus 42 days in the following format: 12 July 2014. If the date format is not specified, StrataMax will use the system date format of your computer.

The field number ('12' in the example above) must be the same in both field positions.

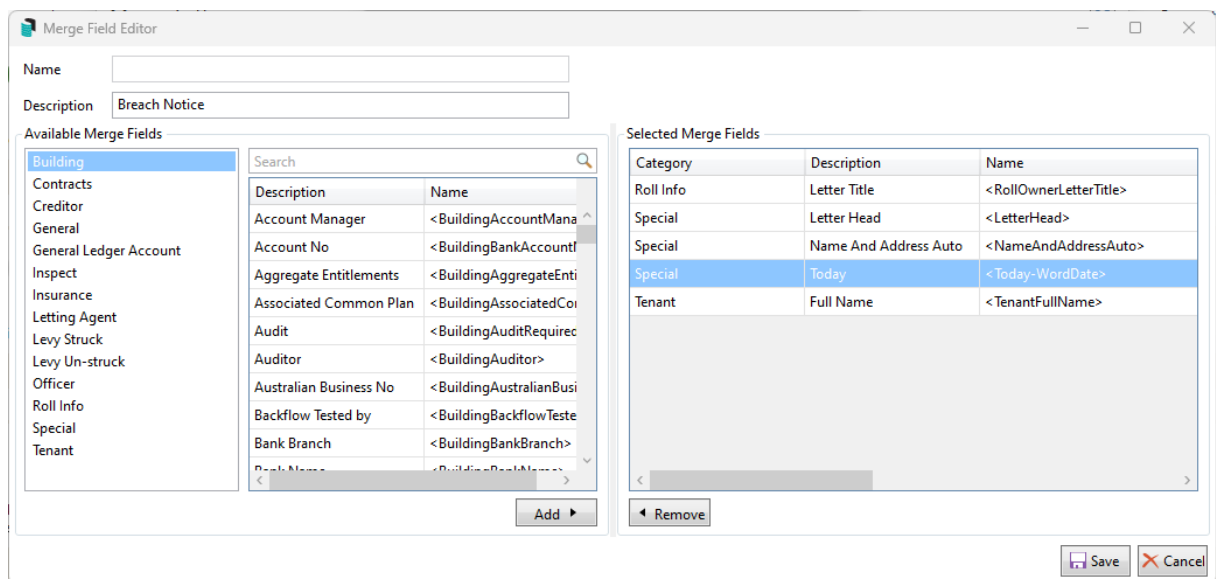

-Trim021	Removes leading 02100000 from owner account codes
-Less(??)Days	Adjust inserted data (if a date) by the number of days inside brackets
-Plus(??)Days	Adjust inserted data (if a date) by the number of days inside brackets
-Less(??)Months	Adjust inserted data (if a date) by the number of months inside brackets
-Plus(??)Months	Adjust inserted data (if a date) by the number of months inside brackets
-WordDate	Prints date in words

1. Search or select **Merge Letters** from Main or Sub-Group.

2. From the Report Selection window, click *Merge Letters*.
3. Click *Fields* to display the *Merge Field Editor* screen.
4. Select the merge field that requires formatting and right-click. Apply Formatting (Full List of commands) or Transformation (Short List of Commands)

5. Select the formatting command to apply.

6. Apply any other formatting commands as needed.
7. Click *Save*.

To update any formatted merge fields, these will need to be deleted and re-added as needed.

# Building Merge Fields

The Building Merge Fields extract information entered in the ***Building Information*** menu.

Legacy Merge Field No.	Merge Field Name
231	Account Manager
170	Account No.
11	Aggregate Entitlements
246	Associated Common Plan
22	Audit
87	Auditor
108	Australian Business No.
261	Backflow Tested By
169	Bank Branch
168	Bank Name
2	Body Corp No
3	Body Corporate Name
72	Body Corporate Name - Long Name
223	Builder Address
224	Builder Address
225	Builder Address
228	Builder Comments
233	Builder Fax
227	Builder Mobile
222	Builder Name
226	Builder Telephone
28	Building Valuation Amount
30	Building Valuation Date
50	Committee Spending Limit
237	Community Scheme D.P.
248	CTS No.

147	Termite Next Due
250	Total Interest Entitlements
214	Trust Account (Y/N)
4	Type
202	Type of Construction-Floors
203	Type of Construction-Walls
79	Type of Last Meeting
143	Workplace Health & Safety Last Due
142	Workplace Health & Safety Last Inspected
106	Workplace Health & Safety Prepared By

## Contracts Register Merge Fields

The **Contracts Register** merge fields extract information entered for the chosen contract in the **Contracts Register** menu. StrataMax uses the code number, therefore if producing a global merge document, to ensure accuracy of information reported, the same code number would need to be used for same contract types in all your buildings.

Legacy Merge Field No.	Merge Field Name
14	Basis of Remuneration
4	Category
2	Code Number
15	Commencement Date
30	Common Property Group
6	Contract Address (1)
7	Contract Address (2)
8	Contract Address (3)
5	Contractor Name
18	Copy of Agreement on File?
20	Date of Advice from Financier
21	Date of Withdrawal of Financier
10	Delegated Powers
9	Details of Duties
31	Doc ID (DocMax Document ID)
11	Estimated Cost of Contract

13	Estimated Cost of Outlays
12	Estimated Cost of Remuneration
29	Expiry Date
28	Increase Due
27	Increase Rate
26	Last Renewal Date
19	Name of Financier
24	Next Option Renewal Date
25	Option Notice Period
17	Option Notice Period
3	Options
16	Reference Number
23	Termination Date
22	Workers Comp Number

## Creditors Merge Fields

The Creditors Merge Fields are directly from the data in *Creditor Maintenance*.

Legacy Merge Field No.	Merge Field Name
42	Accountant's Name
34	Address (1)
35	Address (2)
36	Address (3)
58	Australian Business No.
100	Bank Account No.
99	BSB Number
60	Builders Licence Details
2	Code
65	Comments (1)
111	Contractor Industry
3	Description
98	EFT Active
130	Email Address
52	Facsimile Number
115	GST Registered

57	Indemnity Insurer
56	Issue Work Orders by
108	Letter Title
62	Licence Expiry Date
105	Location ID
129	Maxinfo Reg No.
95	PAYG Tax Rate
64	Prof. Indemnity Expiry Date
55	Prof. Indemnity Policy No.
82	Prompt/Preferred Banned
85	Public Liability Expiry Date
119	Public Liability Insurer
120	Public Liability Policy No.
53	Salutation
45	Salutation (2)
103	Telephone Mobile
51	Telephone Number
102	Telephone Number (2)
63	Workers Comp Expiry Date
112	Workers Comp Insurer
54	Workers Comp No.

## Data Formatting

Data formatting changes the format from which they are entered in StrataMax. The benefit of applying data formatting is that it changes the format without merging and then editing the dates or calculating other dates.

For example, you may have inserted the 'Financial Year End' merge field (BuildingFinancialYearEnd), without applying any data formatting so that the date would display as *DD/MM/YY*. However, when the '*DayAndWordDate*' formatting merge field is applied to the financial year-end merge field, it will display as Thursday, 16 June 2023.

## Adding Data Formatting

After the merge document has been created and all required merge fields are inserted, the below data formatting can be applied.

1. From the Merge Field Editor, select the *Category* list, select the appropriate merge field from within the category and click *Add* to add this to the *Selected Merge Field* area.

2. From the table of Selected Merge Fields, right-click and select *Formatting*. Select the formatting requirement for the field.

- For example, «Building Financial YearEnd-DateandWordDate» will be displayed on Thursday, 16 June 2023.

This contains the format of <<Today>> merge field with data formatting applied with a Plus (??) Days format for one month with an additional Word Date format

Merge Field Name	Example
WordDate	Inserts Day and Date entered: Thursday 14/07/23
DayAndWordDate	Inserts Day and Word Date: Thursday 14th July 2020
First Name Only	Inserts First Name from the Full Name entered in the Roll
Less (??) Months	Deducts the # of months entered (??) from the date of the merge field chosen
Less (??) Days	Deducts the # of days entered (??) from the date of the merge field chosen
Money	Money format \$0.00
Plus (??) Days	Adds the Number of Days inserted from the chosen field
Plus (??) Months	Adds the Number of Months inserted from the chosen field
Slash Date	This will remove the / between the numbers
Time12Hour	12 Hour Format: 10:00am
Title Case	This will use Title Case (same as Word)
Trim 021	Lot Owner Account number starts with 021, inserting this merge field before the account number will remove the first three digits
Trim Left(?)	This will remove the account number leaving just the lot number
Word Date	Displays in Word Date Format

## Adding Transformation

Adding transformation will allow for merge fields to have a calculation applied to the merge field to wither add or remove characters or days when using date fields and can be useful when trying to produce a document that contains a reference to a date based on another date or removes the account number references when using these merge fields.

## General Merge Fields

These general merge fields are very similar to the General Ledger merge fields, with the only difference being the General merge fields will report the merge field selected for either a lot owner, officer, creditor etc. As opposed to the General Ledger merge fields where you may select the year-to-date balance

merge field and select *012 Cash At Bank* to report the balance of the account.

Legacy Merge Field No.	Merge Field Name
30	30 Days
31	60 Days
32	90 Days
33	90+ Days

5	Underline Total? (YN)
49	Unit Number
96	Update Code
82	Use Alt Address for Levy Notice
112	Workers Comp No.
11	Year to Date Bal.

## Inspections Merge Fields

The inspections merge fields extract information entered for the chosen inspection type. StrataMax uses the code number, therefore if producing a global merge document, to ensure accuracy of information reported, the same code number would need to be used for same type of inspections in all of your buildings.

Legacy Merge Field No.	Merge Field Code
2	Code
3	Category
4	Period
5	Next Due
6	Last Done
7	Last Inspection by (Code)
8	Last Inspected by
9	Result
10	Result Rating
11	Report Doc ID
12	Property Details A/C
12	Property Details
14	Special Instructions

## Insurance Merge Fields

The Insurance merge fields are the same as in [Insurance](#). You may extract the data for each policy type, StrataMax uses the code number, therefore if producing a global merge document, to ensure accuracy of information reported, the same code number would need to be used for same insurance policy types in all of your buildings.

Legacy Merge Field No.	Merge Field Name
11	Broker/Agent
12	Broker/Agent (1)
13	Broker/Agent (2)
2	Code
16	Comments

41	Storage Space No.
22	Telephone (1)
23	Telephone (2)
34	Time
28	Unit Number
31	Use Notice Address for Notices
15	User Name

## Levy Control Merge Fields

The levy control merge fields extract the levies entered in *Levy Management*. The levy control fields only use levies which have been struck but not necessarily generated.

Prior to inserting the merge fields for levies, print a Levy Register (Summary Only). For each Levy Type, a number of levies will be listed, if there are four levies listed for the Administration Fund and you would like the last levy to appear in your merge document, then this would be 'Levy Number 4'.

For the first Levy Type e.g. Administrative Fund

- Levy Number 1 = first levy on the Levy Register
- Levy Number 2 = second levy on the Levy Register
- Levy Number 3 = third levy on the Levy Register
- Levy Number 4 = fourth levy on the Levy Register (and so on)
- The same will apply to each *Levy Type*, e.g. Sinking Fund, Insurance, Special etc.

For each levy control merge field, you will need to select a *Levy Type* and then the *Levy Number*.

## Identifying Levy Control Merge Fields

- <LevyControl0113> Levy Control Merge Field/Levy Type 01 (Admin Fund)/Levy Number 1/Merge Field 3
- <LevyControl0745> Levy Control Merge Field/Levy Type 07 (Sinking Fund)/Levy Number 4/Merge Field 5

If you are not sure of the 'Levy Type' number (check invoice codes in [Levy Management](#)).

Legacy Merge Field No.	Merge Field Name
3	Description
4	Determine Date
8	Discount Date
9	Discount Rate
7	DueDate
15	Entitlement Schedule
11	Generation Date
10	Net Ent. Rate
1	Number
5	Period
13	Purpose/Reason
6	Rate per U/E
14	Regular/Special (0/1)
12	Strike Date
17	Total Gross Charge

18	Total Net Charge
2	Type

## Levies Unstruck Merge Fields

The levies unstruck merge fields extract the levies entered in [Levy Management](#), which have not been struck or generated. Similar to the 'Levy Control' merge fields, when inserting the 'Levy Control' merge fields, the *Levy Number* will start from the first unstruck levy not the levies already struck or generated.

For each 'Levies Unstruck' merge field, you will need to select a *Levy Type* and then the *Levy Number*.

## Identifying Levies Unstruck Merge Fields

- <LevyPrep0113> Levies Unstruck Merge Field/Levy Type 01 (Admin Fund)/Levy Number 1/Merge Field 3
- <LevyPrep0745> Levies Unstruck Merge Field/Levy Type 07 (Sinking Fund)/Levy Number 4/Merge Field 5

If you are not sure of the 'Levy Type' (check invoice codes in [Levy Management](#)).

12	Strike Date
17	Total Gross Charge
18	Total Net Charge

2	Type
---	------

## Office Bearers Merge Fields

The officers/office bearers/committee members merge fields obtained from the *Office Bearers* screen. You may extract the merge data for each person currently on the committee. As the committee member may have more than one position and this information is contained within the building, preparing a 'generic' merge document would involve inserting each combination of positions. Alternatively, if preparing a notice of AGM, edit the original and insert those committees that have been nominated.

Legacy Merge Field No.	Merge Field Name
6	Address (1)
7	Address (2)
8	Address (3)
11	Business Telephone
2	Code Number (Account Code Number)
15	Comments (1)
