

# Search Buildings

Last Modified on 08/07/2025 1:32 pm AEST

The instructions in this article relate to **Search Buildings**. The icon may be located on your *StrataMax Desktop* or found using the *StrataMax Search*.

The **Search Buildings** screen has been designed for users to search specific fields in **Building Information** across all buildings in a portfolio. Searches can be saved for continuous use, which can then be optionally exported to Excel or produced into a PDF-style document. To view or export a list of all buildings, you can use **Search Buildings**. This allows you to export to Excel and report across many fields for a single building, multiple buildings, or globally across all buildings.

It is recommended to use **Search Buildings** for all global reporting of **Building Information** fields that **Global Reports** (*Group* and *Custom Reports*) may have previously been used for.

## Search Buildings | Security

To access the **Search Buildings**, the user must have permission set to 'Allow' for *Search Buildings* under the 'Building' category in **Security Setup**.

## Search Buildings

Using the 'Restrict To' fields, **Building Information** data can be limited to what needs to be displayed, whether it is based on 'Building Name,' 'Account Manager,' 'Legislation' and more. Clicking the

*Advanced* button displays more tabs so that columns can be included or excluded, setting of the sort order, and limiting the maximum number of records to report.

The results can also be saved for a *Saved Search*, which will allow this to be used at a later time and can be made available for a single *User* or *Group*.

To select multiple fields in the 'Columns' display area, click the first field, hold the keyboard Ctrl key, and select the following field. This will select both fields and allow these to be moved up or down simultaneously.

## Setting Up Filters

Using filters, the results of the report can be based on specific requirements. To set up the reporting requirements follow the below steps:

1. Search or select **Search Buildings**.
  - By default, the 'Building Name' and 'Legislation' **Fields** are selected.
2. Select the green *plus* button to add more **Fields**, then click the drop-down menu to choose the required **Field** (from *Building Information*).
  - If a **Field** needs to be removed, click the red *minus* button next to the field.

The screenshot shows the 'Buildings' filter interface. At the top, there are buttons for 'Refresh', 'Export', and 'Advanced'. Below these is a table with three columns: 'Field', 'Condition', and 'Value'. The first row has a red minus button next to 'Building Name', which is highlighted with a red box and a red '2'. The second row has a red minus button next to 'Legislation'.

3. Depending on the selected **Field**, the **Condition** may or may not be changed to suit your needs ('Is equal to', 'contains', 'is in the range,' etc.)
4. Select the required **Value** - selected by radio button, chosen from a drop-down menu with data options, date ranges or specific dates, or typed manually.
  - If the **Value** can be either typed or selected from a drop-down menu, you can clear the selection by clicking the red cross icon next to the **Value**.

The screenshot shows the 'Buildings' filter interface. The 'Value' column is highlighted with a red box. The first row has a red cross icon next to the 'Value' field, which is highlighted with a red box. The second row has a red cross icon next to the 'Value' field.

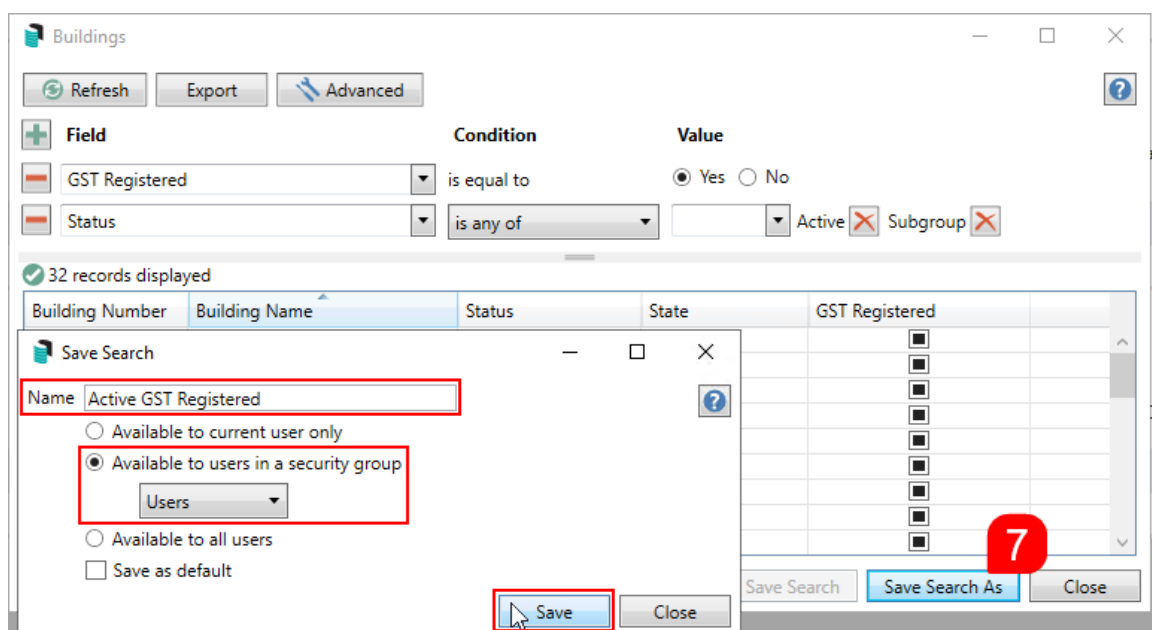

5. Click the *Refresh* button to load the results.
  - Click a column header to sort the data by that column.
6. Click the *Export* button if the data needs to be exported to Excel where it can be freely modified or

printed as a report, etc.

7. Optionally, the results can be saved as a 'Saved Search' for convenience, so that it can be loaded at a later time.

- Click *Save Search As*.
- Type in the *Name*.
- Select the User/s or Group that it's available for.
- Tick the *Save as default* box if this is the data to be displayed each time the User/s or Group open the **Building Search** screen.
- Click the *Save* button.

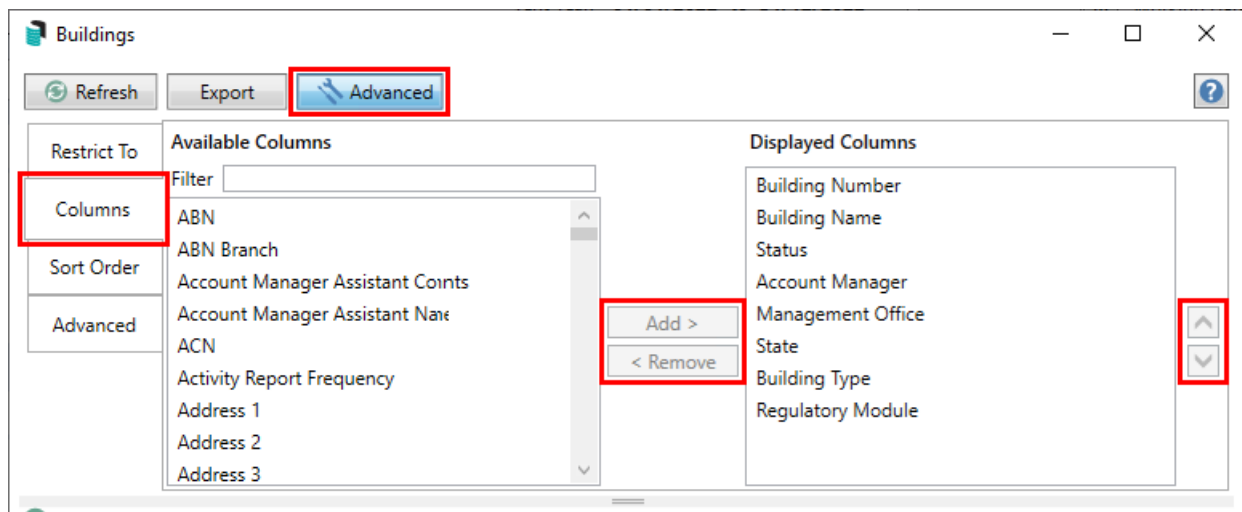

Each column can be clicked on to adjust the sort order.

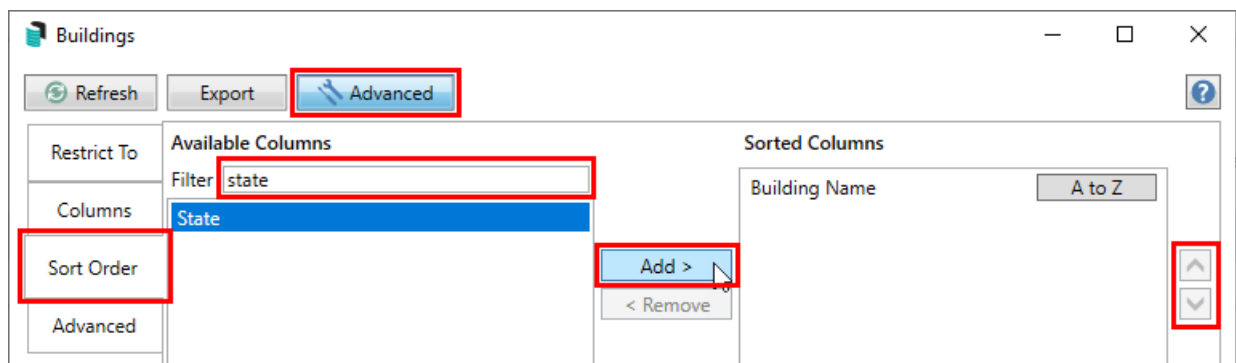

## Setting Display Columns & Sort Order

The displayed columns can be changed by clicking the *Advanced* button, then selecting the *Columns* tab. Select the required column (use the *Filter* to search for the required column) and use the *Add* or

*Remove* buttons. In the displayed columns section use the *Up* and *Down* arrows to move the required columns.

The sort order can be changed by clicking the *Advanced* button, then selecting the *Sort Order* tab. In the **Available Columns** list, select the required column (use the *Filter* to search for the required column), and click the *Add* button to add the column. In the **Sorted Columns** list, use *Remove* button to remove a column and the *Up* and *Down* arrows to move the required columns up or down the list.

## Search Buildings | Saved Searches

'Saved Searches' are designed for convenience so that you can save a selection of fields, columns, and a specific sort order so that it can be loaded later. There is also a tool to assist with quick-finding fields of text information. Use the top right corner and enter text into this field to search. Click *Find First* or *Find Next* to locate results.

'Saved Searches' can also be set as the 'default' search for the selected screen. This means that the selection of fields, columns, and specific sort order will be the one chosen whenever the menu screen/icon is selected.

'Saved Searches' can be saved for the current user, globally (accessible to all users), or for a specific user group.

If a Saved Search is loaded/opened this will be noted at the top of the search screen.

Work Orders

Refresh Export Advanced **Saved Search: Outstanding Work Orders**

Field	Condition	Value
Current Building		
Status	is not equal to	E-Finalised ✖
Deleted	is equal to	<input type="radio"/> Yes <input checked="" type="radio"/> No

## Saved Searches | Security Setup Permissions

A security permission will either allow or deny individual *Users* or *User Groups* access to create or delete a search. The permission is called 'Save Group and Saved Searches' under the 'Menus' category in [Security Setup](#). You can also type the word 'Search' into the filter field and click the *Filter* button to see the permission.

If the *User* or *User Group* do not have the permission set to 'Allow' then the ability to save a search for all users or a user group will be inactive.

Save Search

Save Close

## Saved Searches | Set up a new Saved Search

- Configure the required fields and click the *Refresh* button to display the required data.
  - Optionally click the *Advance* button to also configure the displayed columns, and specific sort order.
- Click the *Refresh* button to display the data.
- Click the *Save Search As* button, and the 'Save Search' window will appear.
- Enter a 'Name'.
- Select one of the three radio buttons, depending on your requirement:
  - Available to current user only* will save the search for the current user only.
  - Available to users in security group* will save the search for the *User Group* selected from the drop-down (this radio button is only available if you have the right permission, and the *User*

*Groups* available in this list are limited to the *User Groups* that you are a member of).

- *Available to all users* will save the search for all StrataMax users (this radio button is only available if you have the right permission).
6. Optionally tick the *Save as default* box to load this 'Saved Search' whenever the menu screen/icon is opened.

## Saved Searches | Load or Delete a Saved Search

1. At the bottom of the screen, click the *Load/Delete Search* button.
2. In the 'Load Search' window, click the blue *Load* button to load the *Saved Search*, or click the red cross button to delete the *Saved Search*.
3. If you click the *Load* button, the 'Load Search' window will disappear, and the screen will refresh automatically and load the *Saved Search* data.
4. If you click the *Delete* button, a confirmation pop-up will appear; Click *Yes* to confirm the deletion.

When a Saved Search is loaded/opened, the Saved Search name will be noted at the top of the search screen.

## Saved Searches | Edit a Saved Search

1. If the *Saved Search* you want to edit has been set as the default search, it should be on screen already, and you can proceed to the next step. Otherwise click the *Load/Delete Search* button.
2. In the 'Load Search' window, click the blue *Load* button.
3. Now make any changes required to the required fields, and optionally click the *Advance* button to also configure the displayed columns, and specific sort order.
4. Click the *Refresh* button to display and check the data.
5. Click the *Save Search* button to save the applied changes.

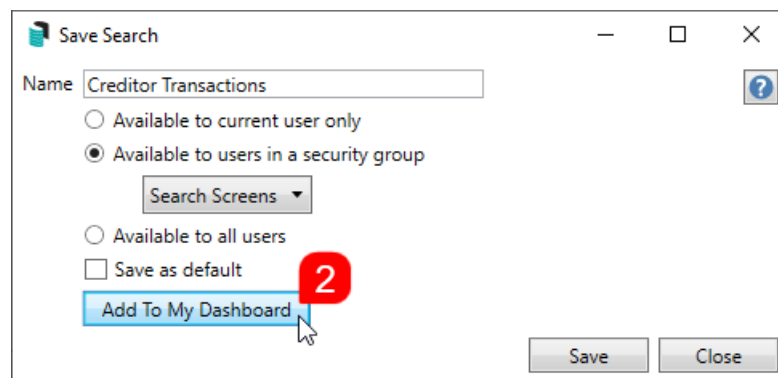

## Saved Searches | Add To My Dashboard

There is the option to add certain searches to your own *Dashboard*. This is limited to your own *Dashboard* only (you cannot add it to the *Dashboard* of another user or group), and only available in these specific 'Search' screens:

- *Search Office Bearers*
- *Search Bank Accounts*

- [Search Creditor Invoice Items](#)
- [Search Work Orders](#)
- [Search Quotes](#)
- [Search Building](#)
- [Search Inspections](#)
- [Search Levies](#)
- [Management Fees Report](#)

1. Follow the steps to set up a new Saved Search, or edit a Saved Search (see the two relevant sections above).
2. In the 'Save Search' window, click the *Add To My Dashboard* button.

3. The 'Dashboard Configuration' window will then appear.
4. The *Report* drop-down menu cannot be changed from 'Saved Search'.
5. The *Display Title* can be changed to whatever is required.
6. Choose the *Display Type* that is preferred. See [Display Types](#) for more information.
7. Tick *Show On Desktop* if preferred.
8. Depending on which *Display Type* was chosen, the fields for the different number values will change. Observe the *Preview* to assist with picking the right number values suited to the *Display Type*.
9. Click the *Save* button.
10. Back in the 'Save Search' screen, there are now buttons to *Edit Dashboard* and *Delete Dashboard*.
11. Click the *Close* buttons on any remaining screens.

## Export and Print

Each search can be exported to Excel or produced as a PDF-style report, and the column display for these reports will be included.

- *Export* - If there are more than 1000 results, Check the *Advanced* tab / Advanced area to report the maximum. Click Export for an Excel report.

- **Print** - Check the cogwheel from the Report Distribution screen to change fonts and set the letterhead style. This print style will produce the report based on the column width. Click Print for a PDF-style report.

## Examples of Searches for Dashboard

The below are some examples of saved searches that can be used as a dashboard to either prompt based on particular dates or to provide quick access to information & reporting. Examples are reliant on fields being populated with data and information as part of your processes and your particular setup of Restrict To, Display Columns and Sort Order may vary to suit your requirements.

### Last AGM where minutes have not been sent (Search Buildings)

Restrict To:

Field	Condition	Value
Building Name	starts with	<input type="text"/>
AGM Last Meeting Date/Time	is on or before	<input type="checkbox"/> Specific Dates <input type="text" value="2 weeks in the past"/>
AGM Last Meeting Minutes Sent	is empty	

Displayed Columns:

Displayed Columns

- Building Number
- Building Name
- Account Manager
- AGM Last Meeting Date/Time
- AGM Last Meeting Minutes Sent

## Assigned Team Members (Search Buildings)

Restrict To: No requirements however you may filter by Account Manager for example

Displayed Columns:

□

## Term Deposits maturing in next 30 days where no instruction has been provided (Search Bank Accounts)

Restrict To:

	Field	Condition	Value
	Building Number	is equal to	<input type="text"/>  
	Status	is not equal to	Removed  
	Account Code	is not equal to	012 - CASH AT BANK  
	TD Maturity Date	is in the next 30 days	
	TD Renewal Instruction	is empty	

Displayed Columns:

□

## Creditor Invoices Awaiting Invoice Hub Approval & dated more than 1 month in the past (Search Creditor Invoice Items)

Restrict To:

	Field	Condition	Value
	Invoice Hub Status	is equal to	Uploaded  
	Invoice Date	is on or before	<input type="checkbox"/> Specific Dates <input type="text" value="1 Month in the past"/> 

Displayed Columns:

□

## Creditor Invoices on hold & dated more than 1 month in the past (Search Creditor Invoice Items)

Restrict To:

□

Displayed Columns:

#### Displayed Columns

- Building Number
- Building Name
- Reference
- Invoice Date
- Invoice Amount
- Invoice Number
- On Hold
- Invoice Hub Status
- Creditor Code
- Creditor Name
- Expense Code

## Inspections due in next 30 days (Search Inspections)

Restrict To: setting the category to specific values allows dashboards specific to inspection types.

	Field	Condition	Value
	Category	is equal to	Sinking Fund Forecast 
	Next Due	is in the next 30 days	

Displayed Columns:

□

## Identify Creditors with no Compliance Code that have had recent activity

Restrict To:

	Field	Condition	Value
	Compliance Short Name	is empty	
	Last Activity	is in the last 7 days	

Displayed Columns:

#### Displayed Columns

- Building Name
- Building Number
- Creditor Code
- Creditor Name
- Balance
- On Hold Total
- Compliance Short Name
- Compliance Long Name
