BAS Reconciliation Report Template and

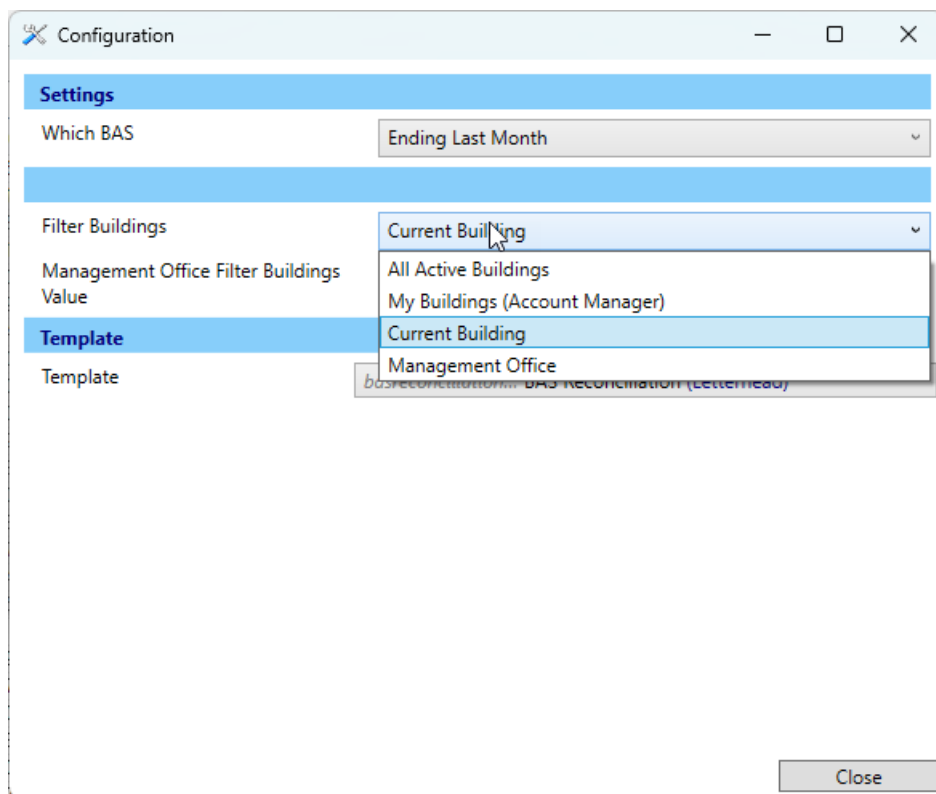

Configuration

BAS Reconciliation Report will display the totals for the selected reporting period that the Building / Plan is registered for. This report can be used to assist with the lodgement of the BAS. It will also report each section of the BAS and detail the totals for each account code in each section to align with the totals.

There is one template available for BAS Reconciliation reporting plus a few configuration items to review. These reports can be applied using the **Report Distribution** method. If the *Filter Buildings* is set to All Active Buildings, all buildings will be included, and it can be useful to produce one report set to send to the appropriate person for BAS lodgement.

The **BAS Reconciliation Report** can be set with a **Report Set** or when using the **BAS Reconciliation Report** from Report Distribution for single reporting.
